

RULEWAVE®

INTERNATIONAL SHIPPING & FORWARDING

Air freight

Air freight

For fast worldwide air transport of cargo of any size, Rulewave relies on its own air freight department. As IATA agent, we offer you reliable door-to-door deliveries at very competitive rates.

Ready for take-off 24/7

We are specialised in the worldwide air transport of ship parts and equipment & supplies for oil and gas companies. From the hot shot delivery of a single O-ring that is indispensable for drilling to a full charter for containers: we provide known and unknown transport services and can be reached 24 hours a day to handle your transport needs. Our own track & trace system at rulewave.nl allows the constant monitoring of your freight.

Hassle-free transit

Today's air transport is all about achieving the shortest possible delivery times against the background of increasingly stringent international security demands. We are Authorised Economic Operator (AEO), a European status in line with the C-TPAT security programme that is exclusively awarded to companies that satisfy strict customs requirements. Our AEO status is your guarantee for transport without delays or unexpected costs.
