

## Purchasing & Procurement

Constant stock availability, without the need to keep products in store or even in your books. That's the main advantage of Rulewave's® purchasing & procurement services.

### Product availability

We offer the very best service from our own storehouses in proximity to the Rotterdam port. The areas are perfectly secured and ideally situated for speedy deliveries across the globe. We rely on years of experience and an advanced stock management system to effectively anticipate your demand. Regardless of how tight the deadlines are, you will receive the desired quality and quantity on time. Period.

### Total cost of ownership

As your partner in supply chain management, Rulewave goes a lot further than mere shipping and forwarding. We ensure that the required products are directly deliverable from our own warehouse. We offer total cost of ownership solutions; products are only recorded on your balance sheet when you actually receive them.
