

RULEWAVE®

INTERNATIONAL SHIPPING & FORWARDING

Shipping & Chartering

Shipping & Chartering

Rulewave offers chartering and ship brokering as part of our range of complete forwarding services. We operate 15 coasters ensuring a fast response to your demand at all times.

Reliability is what it breaks down to

Once your cargo has arrived in one of the major European ports, we handle the subsequent transport of the break bulk. We operate 15 coasters (with an average capacity of 4,500 tons) which continuously cross the North Sea from Antwerp and Rotterdam to a range of destinations, including ports in England, Scotland and Norway. Furthermore, we regularly handle sea transport via the Baltic and the Mediterranean.

Sufficient capacity guaranteed

With Rulewave as your shipping partner, you can rely on fast and reliable transport. Naturally, we are associated with BTS and our ships satisfy all the safety requirements of the ISPS code. Thanks to our in-house charter department, we can always meet your demand, even when our own fleet is fully chartered. In that event, we quickly contact fellow transport companies, which in turn can rely on us in similar circumstances.
